SUMMARY

React Full Stack Developer with hands-on experience building and deploying production-ready web applications using React, Node.js, Express, and SQL databases. Strong experience in real-time applications, REST APIs, and authentication. Proven ability to deliver live freelance and personal projects.

PROJECTS

E-Learning Platform (Android App)

- 07/2026 - 07/2026
- Developed a cross-platform React Native application supporting both Teacher and Student roles through a single codebase with role-based authentication and navigation.
- Integrated LiveKit for real-time live classes, enabling video conferencing with audio, video, chat, and participant management.
- Implemented an AI-powered test paper generator, allowing teachers to create question papers efficiently and manage assessments.
- Built teacher features including paper upload, live class management, student performance tracking, and access to dashboards and course management tools.
- Developed student features such as joining live classes, viewing study materials, attempting assessments, tracking scores through a scoreboard, and monitoring learning progress.
- Integrated REST APIs for authentication, user management, course content, assignments, notifications, and real-time data synchronization.

Frubiia Harvest (E-Commerce & Inventory Management System)

- 02/2026 - 02/2026
- Developed a responsive e-commerce website with a dedicated admin panel for product, order, and inventory management.
- Built a complete **Admin Panel** to manage orders, products, and inventory efficiently.
- Integrated the **Razorpay payment gateway** for secure online payment processing.
- Designed features for real-time order management and inventory tracking. Deployed and maintained the production build.
- Live: frubiiaharvest.in

Accident Detection & Emergency Alert System

- 02/2026 - 02/2026
- Developed an IoT-based accident detection system using ESP32, piezoelectric vibration sensors, and a velocity sensor.
- Detected potential accidents by analyzing sudden vibrations, impact intensity, and changes in vehicle velocity.
- Implemented real-time sensor monitoring on the ESP32 to identify accident-like conditions.
- Designed an automatic emergency alert system that initiates a call to a predefined emergency contact when an accident is detected.
- Developed the system with a focus on real-time response, automated emergency communication, and rider safety.

SwanChat – Social Media Web Application

- 06/2025 - 08/2025
- Developed a responsive and SEO-friendly social media platform using React, Vite, and TypeScript.
- Built REST APIs using Node.js and Express with MySQL for persistent data storage.
- Implemented real-time messaging and notifications using Socket.IO.
- Integrated Cloudinary for image uploads and Google OAuth 2.0 for authentication.
- Deployed frontend on Vercel and backend on Render with production environment setup

Freelance Projects

- 10/2025 - 12/2025
- React Websites
- Developed and deployed responsive, SEO-friendly websites using React, Vite, and TypeScript.
- Integrated Google Forms and W3Forms for lead generation, inquiries, and contact forms.
- Optimized performance and maintained production deployments on Vercel.
- Live Projects: sunbirdeducationcentre.com, interactiveclasses.in

INTERNSHIP

Multifacet Softwares Systems Pvt. Ltd.

React Native

- 07/2026
- Developed high-performance Android applications using React Native with a focus on scalability and user experience.
- Built reusable, maintainable components and integrated REST APIs, authentication, and third-party services.
- Optimized application performance, fixed critical issues, and delivered reliable, production-ready mobile solutions.
- Collaborated with cross-functional teams to design, develop, test, and deploy feature-rich applications.

Riveyra Infotech

React

- 10/2025 - 12/2025
- Developed scalable mobile and web applications using React Native and React.js, delivering responsive and intuitive user experiences.
- Integrated REST APIs, authentication, real-time features, and third-party services while building reusable, maintainable components.
- Collaborated with cross-functional teams to deliver high-quality, feature-rich applications from development to deployment.

EDUCATION

BCA

Allenhouse Business School

03/2027

GPA

7.9 / 10
